

AMENDMENTS TO THE CLAIMS:

Please replace the claims with the claims provided in the listing below wherein status, amendments, additions and cancellations are indicated.

1. (Currently amended) A body sticking sheet for application to a body region of a user which includes an affected area, the body sticking sheet comprising:

a first portion ~~with a small~~ having a first degree of shrinkage ~~applied~~ contactably receivable to ~~[[an]]~~ the affected area~~[[,]]~~; and

a second portion ~~[[with]]~~ including a second ~~[[large]]~~ degree of shrinkage ~~around the former portion~~ contactably receivable to a portion of the body region surrounding the first portion, said second degree of shrinkage being 2 to 20 times greater than said first degree of shrinkage, said second portion being expandable and contractible radially with centering on the first portion.

2. (New) A body sticking sheet according to claim 1, wherein a size of said first portion is about 5 to 50 mm.

3. (New) A body sticking sheet according to claim 1, wherein said second portion includes a notch or incision extending radially inward from an outer periphery thereof.

4. (New) A body sticking sheet according to claim 1, wherein an outer peripheral shape of said second portion is in a general shape of a circle.

5. (New) A body sticking sheet according to claim 1, wherein an outer peripheral shape of said second portion is in a general shape of a triangle.

6. (New) A body sticking sheet according to claim 1, wherein an outer peripheral shape of said second portion is in a general shape of a rectangle.

7. (New) A body sticking sheet according to claim 1, further comprising adhesive applied to a contact side of each of said first and second portions.

8. (New) A body sticking sheet for adhesive application to a body region of a user which includes an affected area, the body sticking sheet comprising:

a first portion comprised of a material including a first degree of elasticity

a second portion comprised of another material including a second degree of elasticity greater than said first degree of elasticity, said second portion at least partially surrounding an outer periphery of said first portion and being expandable and contractible radially with respect to said first portion; and

an adhesive being disposed on a contact side of said body sticking sheet including said first and second portions such that said first and second portions are adhesively receivable to said body region with said first portion applied to said affected area.

9. (New) A body sticking sheet according to claim 8, wherein said second first degree of elasticity is 2 to 20 times greater than said first degree of elasticity.

10. (New) A body sticking sheet according to claim 8, wherein a size of said first portion is about 5 to 50 mm.

11. (New) A body sticking sheet according to claim 8, wherein said second portion includes a notch or incision extending radially inward from an outer periphery thereof.

12. (New) A body sticking sheet according to claim 8, wherein an outer peripheral shape of said second portion is in a general shape of a circle.

13. (New) A body sticking sheet according to claim 8, wherein an outer peripheral shape of said second portion is in a general shape of a triangle.

14. (New) A body sticking sheet according to claim 8, wherein an outer peripheral shape of said second portion is in a general shape of a rectangle.
